Don Mouth Naturalization and Port Lands Flood Protection Project

Toronto and Region Conservation Authority

Working Session #2

Tuesday, August 23, 2005

Don Mouth Naturalization and Port Lands Flood Protection Project

Toronto and Region Conservation Authority

Working Session #2

Tuesday, August 23, 2005, 6:30 – 9:00 pm

PROPOSED AGENDA

- Meeting Purpose:
- To present the “Alternatives To” which have been identified
 - To present the framework for the identification of alternative methods
 - To learn from the public what additional information should be considered

6:30 Welcome, Introductions & Agenda Review

Adele Freeman, TRCA

Nicole Swerhun, Facilitator

6:40 Overview Presentation: Alternatives

Paul Murray, Gartner Lee Limited

Questions of Clarification

7:30 Small Group Discussion

1. Review the list of “Alternatives To” (defined as the different locations where the Don will discharge into Lake Ontario) that the study team is proposing to include in the EA Terms of Reference (TOR). Are there any additions or other changes to the list that you would like to see considered? Why?
2. Review the approach that will be used to guide the identification of Alternative Methods. Do you have any comments on and/or suggested edits to:
 - i) the preliminary list of possible forms or features?
 - ii) the preliminary list of desirable river functions?
 - iii) the overall approach proposed to identify Alternative Methods?

8:30 Plenary Discussion

8:55 Closing Remarks, Next Steps

Adele Freeman, TRCA

9:00 Adjourn

1. Review the list of “Alternatives To” (defined as the different locations where the Don will discharge into Lake Ontario) that the study team is proposing to include in the EA Terms of Reference. Are there any additions or other changes to the list that you would like to see considered? Why?

2. Review the approach that will be used to guide the identification of Alternative Methods.

Do you have any comments on and/or suggested edits to:

- i) the preliminary list of possible forms or features?

ii) the preliminary list of desirable river functions?

iii) the overall approach proposed to identify Alternative Methods?
