

Retire Your Lawnmower Workshop

Date: June 20, 2012

Watershed: Etobicoke Creek

Region: Peel

Municipality: Brampton

Partners: TRCA, Region of Peel, City of Brampton

A group of 13 people gathered to learn about reducing lawn space and creating more natural areas in their yards. This workshop introduced methods to create attractive garden space with walkable paths using materials to blend with the environment. These areas will attract native pollinator species and provide habitat for wildlife. By creating this space, it will reduce lawn mowing and allow your time to be spent enjoying the natural space in your area.
