

2013 Accomplishments

Headwaters, Brampton Christian School

Date: February 25, 2013

Location: Brampton Christian School

Watershed: Etobicoke Creek

Region: Peel

Municipality: Caledon

Partners: TRCA, ACER, Evergreen, Sir Sandford Fleming College, Brampton Christian School

TRCA is initiating a protocol to engage students, community groups and local residents to monitor growth of young, newly planted vegetation. In this pilot project, 44 students from Brampton Christian School joined TRCA and representatives from ACER, Evergreen and Fleming College students to monitor a newly planted site located along the Etobicoke Creek running through the property. This valuable data will provide information on threats caused by insects, disease, climate change and wildlife. The first 5 years of growth are critical to young trees and shrubs in order for success.

Positive Environmental Impacts
