

2014 Accomplishments

Valleywood Meadow Plot

Date: July 6, 2014

Location: Etobicoke Creek Trail—Valleywood

Watershed: Etobicoke Creek

Region: Peel

Municipality: Caledon

Partners: TRCA, Region of Peel, Town of Caledon, Community Residents

An enthusiastic group of local residents came out to the newly created meadow plot at Valleywood, in the Town of Caledon. This group planted 545 native wildflowers which provide an essential food source and habitat for our native pollinators. Habitat such as “bee condo’s” and bird structures will also be strategically placed in the surrounding area during future events. Stewardship activities such as this bring awareness of natural spaces and educate on the importance of pollinators and wildlife.

Positive Environmental Impacts

Vegetation Planted	# of Pieces Planted	Volunteers	Volunteer Hrs
Wild Flowers	545	16	48
